Refill * Reuse * Rejoice

Plaine Products exists to offer an easy solution to our single-use plastic problem: luxurious vegan personal care products in aluminum bottles that can be returned to be sterilized, refilled and reused.

ABOUT PLAINE PRODUCTS

Plaine Products was founded by two sisters, Lindsey and Alison Delaplaine. We began with a dream to have less plastic in the world. After looking around our bathrooms, we realized how much plastic we owned. We started thinking about how to change that and how to make it easier for others to do the same. And Plaine Products was born.

Make a choice that's good for you and the planet.

HAIR AND BODY CARE PRODUCTS

Our highly rated hair & body care products are available in Rosemary Mint Vanilla and Citrus Lavender. Vegan ingredients bring hair back to life and restore manageability, adding sheen and softness from roots to ends. Our body products gently clean and hydrate while restoring nutrients and powerful antioxidants to skin. Together they make a shower feel like a spa.

TRAVEL PRODUCTS

Our travel size containers allow you to take Plaine Products on the road to nourish your hair and body. Eliminating the need for little plastic bottles, these reusable travel size can be refilled from our 16 oz products. All of our travel size are available in Rosemary Mint Vanilla and Citrus Lavender.

FACE CARE PRODUCTS

With a light citrus scent, this face wash and face moisturizer will gently clean and soften without stripping your skin. Used daily, the Vitamin C cleanser helps refine your skin's tone and texture and fights against the signs of aging. The renewing face moisturizer softens skin, smooths out fine lines and wrinkles, refines texture and never clogs pores. Specifically formulated for the face, these products work for both men and women.

Why aluminum is better than plastic

ALUMINUM can be recycled with no loss in quality. It can be recycled infinitely saving 96% of the energy needed to produce from virgin bauxite ore.

VS

PLASTIC is downgraded when recycled so it has a limited life and will end up in a landfill, or ocean, eventually.
